1. Register of exemptions for Technical Rules Clause 3.2.1(d)(2)

Applicable clause	Exemption details
Technical Rules 2016; Clause 3.2.1(d)(2)	***Negative phase sequence voltage*** *Technical Rules (Rules) clause 3.2.1(d)(2) requires Users directly connected to the transmission system to be connected to all three phases. Where a User proposes a two-phase connection, Western Power requires a Rules exemption request to be submitted. The exemption request is to be supported by information and analysis to enable a determination as to whether the conditions detailed below, can be met.* *The information and analysis provided as supporting information for the exemption request needs to demonstrate that the continuous operation of the nominated connection point, with the cl. 3.2.1(d)(2) exemption in place, will not:* *1. adversely affect the power system stability or security; and* *2. impact the quality of supply or reliability for other network Users; and* *3. breach the limits set out in cl. 2.3.5 of the Rules.* An exemption application for each qualifying connection point is still required. 2. Register of exemptions for Technical Rules Clause 3.6.7.2(a)

Applicable clause	Exemption details
Technical Rules 2016; Clause 3.6.7.2(a)	Under this exemption, the Rules clause 3.6.7.2(a) is modified for the specified location only, and it now states: **3.6.7.2 (a)** "Each *facility* at which a *generating unit* in a small *power station* is connected to the *distribution system* must contain one main switch provided by the *User* for each *connection point* and one main switch for each *generating unit*, where a *generating unit* shares a *connection point* with other *generating units* or *loads*. **Alternative arrangements comprising of clearly labelled multiple main switches will be accepted, provided response to faults on the network or on the User's installation is not adversely affected by this change.** For larger installations, additional *connection points* and main switches or a dedicated feeder may be required."

5. Register of exemptions for Technical Rules Clause 3.6.10.1(g)

Applicable clause	Exemption details
Technical Rules 2016; Clause 3.6.10.1(g)	For AS/NZS 4777 compliant inverter embedded generating units with rated capacity greater than 30 kVA and not greater than 1 MVA connecting to the distribution system, and conditional that the installation cannot exceed the network or connection point supply capability, if the inverters: i. connect to the distribution system with a low voltage (LV) network connection point, ii. are certified compliant with the requirements of IEC 62116, iii. are the sole source of embedded generation at the nominated connection point, and iv. the external generator protection relay provides Rate of Change of Frequency (RoCoF) protection, with setting of 4 Hz/sec and a sampling rate of 4 cycles, at the connection point, then that LV installation is exempt from cl. 3.6.10.1(g) requirements for "earth fault protection for earth faults on the distribution system". 6. Register of exemptions for Technical Rules cl. 3.6 for Multi residential sites

Applicable clause	Exemption details
Technical Rules 2016; Clause 3.6	The Users (connection point owners) that can be considered for this exemption must be: • Connected to distribution system via a low voltage connection point, be of rated aggregate inverter energy system (IES) capacity not exceeding and not intending to exceed 500 kVA (or the connection point hosting capacity, whichever is lower); • Comprise exclusively (no other sources of generation) of small IES (< 5 kVA per residence) paired with their respective loads at the individual residential units; • Each individual IES is AS/NZS 4777 certified and IEC62116 compliant; • The electrical installation for the site from the connection point to each individual residence is independently certified as built and maintained in compliance with relevant Australian Standards and Wiring Rules, particularly in relation to protection, control and earthing systems; and • Requesting consideration under this general exemption at the time of application (or quoting the exemption identification number if one has already been obtained). For all eligible Users: i. The IES for each individual residential installation will be assessed under Rules clause 3.7; ii. An overall connection point limit will be established.
