

Consultation: Draft Decision on Proposed Amendments to Western Power's Technical Rules Submitted November 2015

Name: Craig Carter

Comments: In the proposed amendments to the Technical Rules submitted in November 2015, there is an inconsistency in referring to Australian Standard AS/NZS 4777. In some instances when referring to this standard and subsequent amendments to this standard it has been referred to as AS 4777. This of course is the name of the standard last issued in 2005. New Zealand has now adopted the new standard - AS/NZS 4777, of which the section on inverter requirements was issued in October 2015.
