Updated list of exemptions to Western Power's Technical Rules

Western Power has provided the Economic Regulation Authority (**ERA**) with an updated list of exemptions to its technical rules.

The updated list includes exemptions granted from 31 October 2016 to 20 November 2017.

Western Power's technical rules set out the standard requirements for customer connection.

Under certain circumstances, Western Power may exempt a customer from complying with one or more requirements of the rules.

When an exemption is made, Western Power is required under section 12.38 of the *Electricity Networks Access Code 2004* to notify the ERA. The ERA then notifies the public.

Western Power's list of exemptions is available on the ERA [website](#).
