1. Register of exemptions for Technical Rules Clause 3.2.1(d)(2)

Applicable clause	Exemption details
Technical Rules 2016; Clause 3.2.1(d)(2)	<p><i>Negative phase sequence voltage</i></p> <p><i>Technical Rules (Rules) clause 3.2.1(d)(2) requires Users directly connected to the transmission system to be connected to all three phases. Where a User proposes a two-phase connection, Western Power requires a Rules exemption request to be submitted. The exemption request is to be supported by information and analysis to enable a determination as to whether the conditions detailed below, can be met.</i></p> <p><i>The information and analysis provided as supporting information for the exemption request needs to demonstrate that the continuous operation of the nominated connection point, with the cl. 3.2.1(d)(2) exemption in place, will not:</i></p> <ol style="list-style-type: none"> <i>1. adversely affect the power system stability or security; and</i> <i>2. impact the quality of supply or reliability for other network Users; and</i> <i>3. breach the limits set out in cl. 2.3.5 of the Rules.</i> <p>An exemption application for each qualifying connection point is still required.</p> <p>(Refer to https://westernpower.com.au/media/2806/technical-rules-conditional-exemption-notification-clause-321d2-two-phase-supply.pdf)</p>

2. Register of exemptions for Technical Rules Clause 3.6.7.2(a)

Applicable clause	Exemption details
Technical Rules 2016; Clause 3.6.7.2(a)	Under this exemption, the Rules clause 3.6.7.2(a) is modified for the specified location only, and it now states: 3.6.7.2 (a) "Each <i>facility</i> at which a <i>generating unit</i> in a small <i>power station</i> is connected to the <i>distribution system</i> must contain one main switch provided by the <i>User</i> for each <i>connection point</i> and one main switch for each <i>generating unit</i> , where a <i>generating unit</i> shares a <i>connection point</i> with other <i>generating units</i> or <i>loads</i> . Alternative arrangements comprising of clearly labelled multiple main switches will be accepted, provided response to faults on the network or on the <i>User's</i> installation is not adversely affected by this change. For larger installations, additional <i>connection points</i> and main switches or a dedicated feeder may be required."

3. Register of exemptions for Technical Rules Clause 3.6.10.1(a)

Applicable clause	Exemption details
Technical Rules 2016; Clause 3.6.10.1(a)	<p><i>Protection</i></p> <p><i>Provision for protection functions for LV connected, <1 MVA Inverter Embedded Generation as specified in clause 3.6.10 to be installed away from the connection point at an equivalent point, where the equivalent point in the installation must meet all of the following requirements:</i></p> <p><i>The equivalent point is at a distribution board within the installation that connects the User's site load.</i></p> <p><i>The equivalent point is no more than one distribution board downstream from the site's main distribution board and connection point.</i></p> <p><i>The overcurrent protection at the equivalent point grades with the SPD and main switch(es).</i></p> <p><i>The voltage rise to the equivalent point is less than 1%. The voltage rise calculation uses the rated output of the generation without any offset from load from the equivalent point to the connection point.</i></p> <p>An exemption application for each qualifying connection point is still required.</p>

5. Register of exemptions for Technical Rules Clause 3.6.10.1(g)

Applicable clause	Exemption details
Technical Rules 2016; Clause 3.6.10.1(g)	<p>For AS/NZS 4777 compliant inverter embedded generating units with rated capacity greater than 30 kVA and not greater than 1 MVA connecting to the distribution system, and conditional that the installation cannot exceed the network or connection point supply capability, if the inverters:</p> <p>connect to the distribution system with a low voltage (LV) network connection point, are certified compliant with the requirements of IEC 62116,</p> <p>are the sole source of embedded generation at the nominated connection point, and the external generator protection relay provides Rate of Change of Frequency (RoCoF) protection, with setting of 4 Hz/sec and a sampling rate of 4 cycles, at the connection point,</p> <p>then that LV installation is exempt from cl. 3.6.10.1(g) requirements for “earth fault protection for earth faults on the distribution system”.</p> <p>(Refer to https://westernpower.com.au/media/2912/technical-rules-protection-general-exemption-for-inverters.pdf)</p>
