3 July 2024

Reporting a suspected breach of the WEM, GSI or Pilbara Networks Rules

Suspected breach reporting templates updated

The ERA has updated the online form and batch report template for reporting suspected breaches to include a new, optional field:

Participant internal breach reference.

This field is not mandatory. A party reporting a suspected breach can use it to add an internal reference number for the matter being reported. This will help to identify the suspected breach in communications between the reporting party and the ERA.
