

# Notice

18 December 2024

## Water supply, sewerage and irrigation performance data 2014 to 2024

The Economic Regulation Authority has published the [performance data](#) for small water supply, sewerage and irrigation service providers for the period 2014 to 2024.

Water licensees are required to provide performance data to the ERA for each year ending 30 June. The [performance indicators and definitions handbook](#) specifies the data to be provided by licensees for each water service.

The ERA only publishes data for water supply, sewerage and irrigation supply schemes with less than 10,000 connected properties.

There is a separate national reporting framework for water and sewerage supply schemes with more than 10,000 connected properties, which is managed by the Bureau of Meteorology. Information about the reporting framework and previous performance reports are available on the [Bureau of Meteorology's website](#).
