## Dampier to Bunbury Natural Gas Pipeline access arrangement for 2026 to 2030

### Future of gas model

The ERA has published a simplified [future of gas model](#) to assist interested parties to respond to our issues paper on Dampier Bunbury Pipeline's proposed revisions to the access arrangement for the Dampier to Bunbury Natural Gas Pipeline.

The model has been prepared in consultation with DBP and aims to provide stakeholders with information to better understand DBP's future of gas modelling, without disclosing commercially sensitive and/or confidential data. The ERA has identified the future of gas as a key area of interest in its issues paper.

### Background

On 2 January 2025, DBP submitted proposed revisions to the Dampier to Bunbury Natural Gas Pipeline access arrangement for the sixth access arrangement period (AA6): 1 January 2026 to 31 December 2030.

The ERA published an initiating notice on 23 January 2025, inviting public submissions on DBP's proposal.

An issues paper was subsequently published on 4 March 2025 to assist interested parties with their submissions. At the time of publication, the ERA also published an expert future of gas report that DBP relied on for its future of gas modelling.

Submissions close **Tuesday, 1 April 2025** and can be lodged [online](#).

All documents related to the review of DBP's proposal, including the ERA's issues paper, are available on the [ERA website](#).
