Dear Paul,

AMENDMENT TO LICENCE AREA - ARDYALOON

The Aboriginal & Remote Community Power Supply Project (ARCPSP) Steering Committee is comprised of representatives of Horizon Power, The Office of Energy, Department of Housing & Works, DIA and FACISIA. At a recent meeting of the steering committee it was resolved to seek a reduction in the licence area of the Ardyaloon community to better reflect the existing service areas with allowance for short to medium term growth.

On the attached diagram the current licence area is shown in red. The proposed alternative area is shown as a dark brown line. It takes in the community, an expansion zone to the north-east, and a linear zone to the west that will incorporate infrastructure installations such as bores, sewerage ponds, telecommunications facilities and the power station.

I request that the Economic Regulation Authority amend the licence area for Ardyaloon as proposed.

Yours sincerely,

**GRANT STACY
